Winner KISC 2023

Lokesh Paneru

B.Tech CSE (IoT & Data Science) Student | Hackathon Winner |
IoT & Embedded Systems Developer | AWS & Full-Stack Learner |
Robotics & Cybersecurity Enthusiast
Haldwani, Uttarakhand, India

Summary

I am a B.Tech CSE student specializing in IoT and Data Science (2024–2028) with a strong foundation in software development, embedded systems, databases, cloud technologies, and Linux-based environments. I enjoy working close to the core of technology, where code, hardware, networks, and infrastructure come together.

My technical skill set includes C, Embedded C, C++, Java, Python, JavaScript, along with Node.js, Express.js, Next.js, and databases such as MySQL, MongoDB, and Oracle SQL. I have hands-on experience in IoT development, integrating microcontrollers, sensors, and backend systems, and I am comfortable building and deploying real-world applications.

Currently, I am expanding my expertise in Robotics, AIoT, and ROS, while also strengthening my understanding of system security, networking, and ethical hacking. I follow a practical, experiment-driven learning approach and aim to grow into a high-impact engineer capable of building secure, scalable, and intelligent systems.
